Executive Summary

The deliverable D6.14 Data Management Plan (DMP) provides an analysis of the main elements of the data management policy that will be followed in NIGHTINGALE. It describes the data management lifecycle during the lifetime of the project and after the project is completed. It illustrates what data will be collected, processed, or generated and which methodology and standards will be followed, whether and how this data will be shared and/or made open, and finally, how the produced data will be curated and preserved. The DMP has been developed based on the information that is currently known to the partners at this initial stage of the project. It will constitute a living document to be updated as needed according to the project developments and the Horizon 2020 guidelines.
